ACADEMIC PROJECTS

❖ File System Based Vaccine Management System (July 2021)

Developed a file maintenance system, for a single healthcare organization that maintains the vaccination status of the patients. The patients can be searched with a unique key given to them at the time of vaccination ensuring no redundancy and proxy. The algorithm used is B+Tree. Language: Java

❖ WORKOUTS - A web-based fitness application (March 2021)

Workouts is a fitness web application that is developed to work as a digital advertising platform for a fitness centre. It has an attractive design and interface and comes with a built-in BMI calculator encouraging the user to join the centre. HTML, CSS, JS.

❖ DBMS based Online F.I.R complaint and Criminal Record Management Portal (September 2020)

Implemented an online F.I.R filing system for users to register a complaint online immediately when in need which would be verified by the police on the other end, thus saving time. It also maintains criminal records. HTML, CSS, JS, MySQL

❖ Personal Portfolio (V3) (April 2020)

Created a personal portfolio during the lockdown after learning basic web. It is static and responsive. Built using HTML, CSS, JS and Tailwind. You can check it out here: [Personal Portfolio](#)

❖ Virtual ATM Machine (August 2019)

A take on an actual ATM Machine. This project primarily performs all the tasks done by an ATM machine, such as withdrawing the amount, depositing the amount and display of balance after a successful login. The database is stored in a linked list. Language: C++

TECHNICAL SKILLS : C++ | HTML | CSS | JS | MySQL

LANGUAGES KNOWN : ENGLISH | HINDI | KANNADA | KONKANI

INTEREST : PEN DESIGNING | COOKING | CROCHET
